Time@web

Why work harder?
Work smarter!

Time@web
Creates you time for freedom

Time registration.

- Everything can be found quickly.

Time is one of the most important factors in a company, with our user-friendly but advanced and precise time-tracking system, all employees' time-consuming controls are kept in place, all can be entered on case numbers, so nothing is forgotten either in payroll or billing.

Personalized timesheet is automatically generated by entering services in a calendar or on an order.

All registrations can always be retrieved, printed and exported in PDF or Excel format.

You design all names of services and titles, in the language that suits you best.

It keeps track of all types of hours spent on all employee titles.

A complete overview is created so that at all times, wherever you are, you have access to the archive with all company timetables, as well as each employee having access to his own reports.

Order Monitoring alarm.

- Never forget to invoice an open order.

For sure, you can never forget to invoice an open case / order, our order monitoring keeps track of all non-invoiced open orders and provides an alert if no services have been delivered in any of your specified periods.

Schedule projects and absence.

- Simple planning makes working days less stressed.

Our planner provides an overview of all types of absence and periods, which makes planning of projects and tasks much simpler and more manageable, which can always be followed by, for example, how much holiday has been held and when.

Employees can individually be assigned exactly their absence, everything is being scheduled so the clarity is complete and accurate lists can be read.

Individual customization of modules for employees.

- Pay only for what you need.

Time @ web is modular.

The first license is always the administrator with all the modules available.

Administrator connects and disconnects modules to employees, thus paying only for what is used, and the clarity is retained by the individual employee who can only view assigned modules.

Administration module £ 22,80 opens all modules.

Extra administration module £ 11,70 opens all modules.

Module pricing for connection to users.

Staff groups.

- makes it easy to book more at once.

By setting up employee groups, it is easy and quick to book more employees for tasks.

Send internal messages.

- Practical easy and fast info.

Messages and messages are sent out easily, individually private - for groups or collectively for all.

Search functions.

- makes everything easy to find.

There are optimal search functions in all necessary menus.

QA-quality assurance.

- Your safety assurance.

Quality control is essential to ensure that the products and services delivered to customers meet the requirements of your business and your customers or legislation expect or require.

The entire quality control is collected in one place, which is always available.

You can design your own quality management plans or download and customize those we have added.

QR codes can be printed so reports and schedules can be easily retrieved by simply scanning the code, so you always get the correct schedule.

Control schedules can be created with% batches, thus achieving accurate status both on the process and the economy.

Alarms can be set and sent by sms & mail.

QA control access.

- Provide readership for control.

Let the check look into your quality schedules, saving time and later discussions about the accuracy of your quality reports, they are always updated and approved during the process.

Alarm and advice.

- Never forget a deal.

Here you can put reminders on future service visits, check checks, etc. The system is connected directly to order and QA, and it is free to choose who is advised.

Reminders can be sent as text and mail.

Time@web.

- easy-to-use, easy-to-use tool, where you can influence the development we are listening to with good ideas, together only we can improve the system.
